

Water Management with Well Site Construction and Stabilization

INDEPENDENT
MEANS

Detroit Riprap

One of the early
erosion/water
management
practices

THE TOOLBOX

What is The Toolbox?

- 💧 A collection of Best Management Practices(BMPs):
 - 💧 schedule of activities
 - 💧 prohibition of practices
 - 💧 controls (erosion and sediment)
 - 💧 maintenance procedures

BMPs

. . . making the best choices about efficient and effective erosion and sediment control while balancing the other aspects of the construction project.

Take Action/Get Results

- 💧 Anticipate/manage potential erosion issues.
- 💧 Employ practical methods to reduce this potential.
- 💧 Effective erosion control eliminates the need for sediment control.

💧 Implement timely and appropriate BMP solutions - individually, or in combination, site-specific, properly installed.
